BRAND FAMILY OVERVIEW
Micryl™ waterbased coatings offer water and grease resistance with exceptional flexo runnability. They are applied over ink as protective, rub-resistant finishes, and also used as low-cost, heat-resistant overprints for porous substrates.

USAGE
This heat resistant gloss overprint is also an excellent choice when a water and grease resistant coating is required and in-line coating is not possible. It imparts useful levels of gloss and ink protection. This product is gluable with both hot melt and cold set glues.

DESCRIPTION
General purpose water resistant coating

PERFORMANCE ATTRIBUTES
This product is used in many applications including the following:
